Featured

New

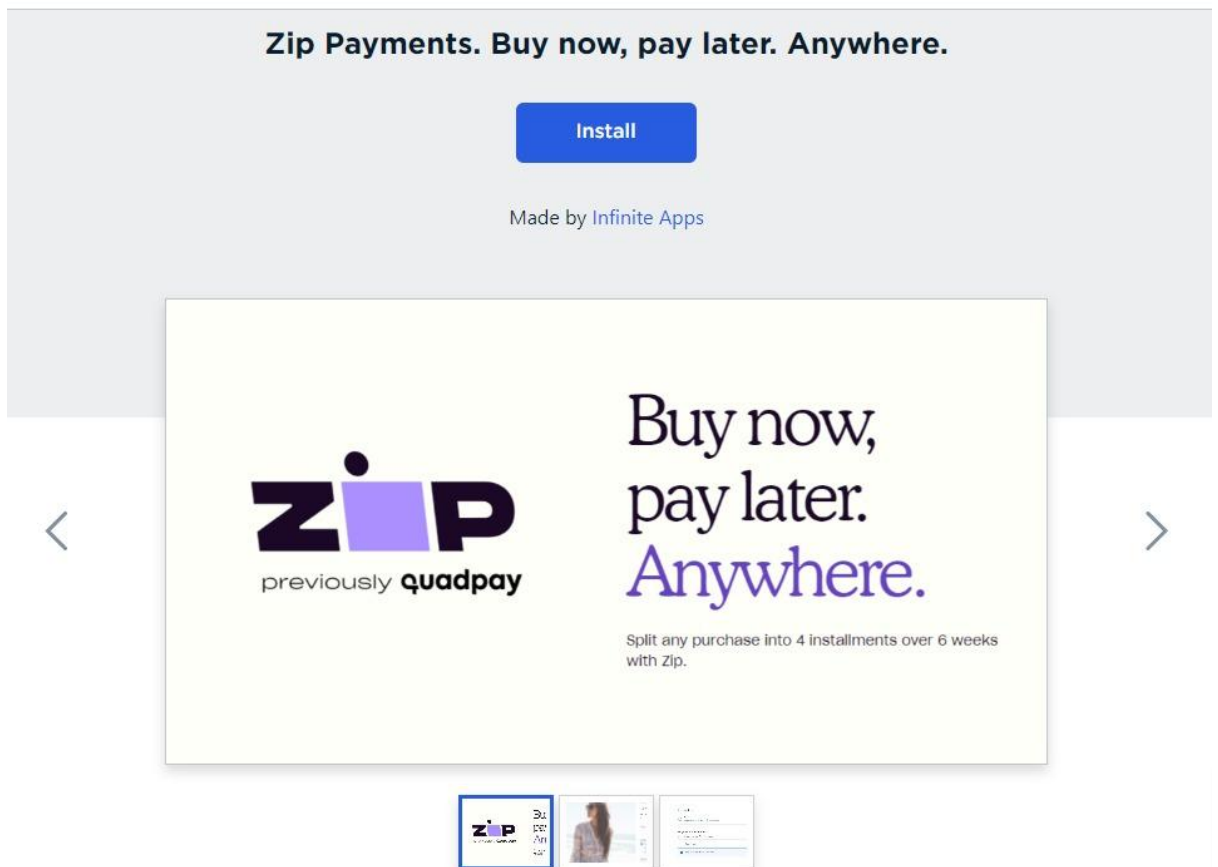

Free

4. Search will return the Zip app

Search results for “zip”

5. Click on the thumbnail and you will see the application description page with the 'Install' button

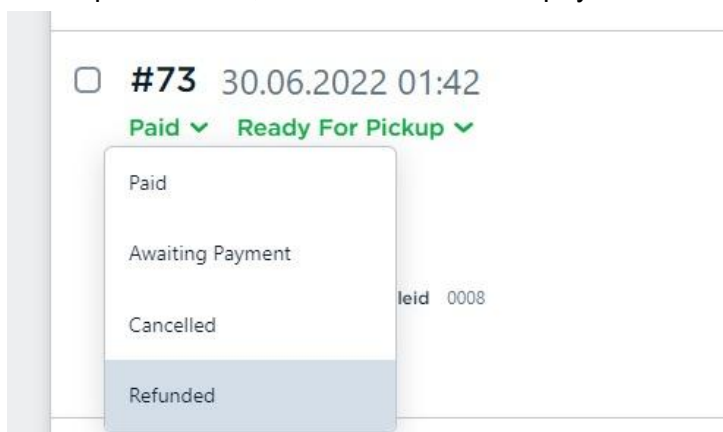

6. Click on the 'Install' button. After installation is done, the app dashboard page will be opened

The screenshot shows the Zip Pay merchant dashboard configuration page. At the top, it says "Zip Pay" and "Buy now, pay later. Anywhere." with the Zip logo. Below this, there are three input fields for "Merchant ID *", "Public key *", and "Private key *". Each field has a placeholder text and a note below it: "You can locate the Merchant ID in your Zip merchant dashboard under 'Settings' -> 'Integrations' -> 'Website Integrations details'." Below the keys, there is a toggle switch for "Directly capture (immediately) the payment" which is currently set to "YES". A note below the toggle says: "How to capture the zip charge. Toggle 'Yes' to directly capture (immediately) or toggle 'No' to authorize (put

7. Paste your Zip Merchant ID, Public and Private key copied over from [Zip Merchant Portal](#) -> 'Settings' -> 'Integrations' -> 'Website Integrations details'. (Take care not to add any additional spaces or characters to these fields)
8. Press 'Save' button to save the configuration
9. You are all set!

Issue Refunds

1. In [Ecwid dashboard](#), navigate to 'My Sales' -> 'Orders'
2. For a specific order, select 'Refunded' for payment status

3. The app will automatically send the notification to Zip to issue a refund for the order
4. *Optionally, you can check that everything went fine in your Zip merchant dashboard*
